

Dr. Hang-Uyen Nguyen-Tang, MD

Pediatric Critical Care

With an extensive background in pediatrics, Dr. Nguyen-Tang has become a trusted figure in the medical community, known for her compassionate care and commitment to providing the highest standard of healthcare for her young patients. Her journey in the field of medicine has been marked by a deep passion for pediatrics and a genuine desire to make a positive impact on the lives of children and their families. She is board certified in Pediatrics.

Throughout her career, Dr. Nguyen-Tang has focused on providing comprehensive pediatric care, including well-child check-ups, vaccinations, and the diagnosis and treatment of childhood illnesses and conditions. Her approach to medicine is characterized by her ability to connect with children and their parents, creating a comfortable and reassuring environment that fosters trust and confidence in her patients' care.

In addition to being part of the HealthBridge Children's team, Dr. Nguyen-Tang is on staff at CHOC Hospital in Orange, Ca. In addition to English, she speaks Vietnamese, French, Spanish and German.

Benefits of Having an On-Site Pediatric Critical Care Doctor:

- ✓ **Immediate Medical Attention:**
 - Enables rapid response in critical situations, ensuring immediate medical care for pediatric patients.
 - Reduces response time during emergencies, potentially saving lives.
- ✓ **Specialized Pediatric Expertise:**
 - Provides specialized care tailored to the unique medical needs of children, including infants and adolescents.
 - Expertise in managing pediatric-specific conditions and illnesses.
- ✓ **Continuity of Care:**
 - Ensures consistent and continuous medical care, especially for patients with chronic or complex conditions.
 - Facilitates seamless coordination between medical teams and specialists, improving overall patient outcomes.
- ✓ **Timely Diagnosis and Treatment:**
 - Enables quick diagnosis of pediatric diseases and conditions, leading to timely and appropriate treatment plans.
 - Swift adjustments to treatment protocols based on the child's response to therapy.
- ✓ **Family Support:**
 - Offers emotional support and reassurance to families during critical situations.
 - Facilitates communication between the medical team and the family, ensuring everyone is well-informed about the child's condition and treatment.
- ✓ **Collaborative Care:**
 - Works closely with other medical professionals and specialists to provide comprehensive care for complex cases.
 - Collaborates with nurses, therapists, and other healthcare providers to create a multidisciplinary approach to treatment.
- ✓ **Improved Outcomes:**
 - Enhances the chances of positive medical outcomes due to immediate and specialized care.
 - Reduces complications and potential long-term effects of critical illnesses, improving the quality of life for pediatric patients.

Having an on-site pediatric critical care doctor significantly improves the quality of care for critically ill children, ensuring timely interventions, emotional support, and specialized medical expertise tailored to the unique needs of pediatric patients.
